# AquaSafe HM 2.5 Confined Space Cleaner

## Technical Data Sheet

### Description:

AquaSafe HM 2.5 Confined Space Cleaner is a specialty formulated blend for paint preparation in confined space areas where worker safety is of the utmost importance. This unique blend is designed to eliminate the need for using dangerous solvents in confined space areas. Having no HAPS or VOC's, AquaSafe HM 2.5 is the "Green, Earth Friendly" product of the operator's choice.

Being non-flammable, biodegradable, and having an exceptional evaporation rate, AquaSafe HM 2.5 is safe, easy to use and eliminates the most common dangers to the operator when preparing confined space areas for painting. AquaSafe HM 2.5 is not just a paint preparation cleaner, but also has the additional benefit of helping to prepare the surface of the steel for superior paint adhesion.

### Application:

- AquaSafe HM 2.5 is to be used "as is" (neat)—no diluting necessary.
- Apply by wiping, brushing, dipping or low pressure spray.
- Remove excess with clean cloth— no rinsing necessary.
- Dry to touch in less than 1.5 minutes +/-

### Physical and Chemical Properties:

Appearance:	Clear, Colourless to light amber liquid
Odor:	Mild
pH (neat):	2.5
Specific Gravity:	1.01 ± 0.015
Pounds/Gal:	8.49
Flammability:	Non-flammable
Biodegradability:	99% Biodegradable

\*See MSDS for PPE precautions.
